Letter Of Recommendation

It is my absolute pleasure to recommend Dr. Dmitriy Babenko as a PhD student at Karaganda State Medical University, Kazakhstan.

I know his scientific work for a few years ago, during our collaboration for publishing common articles in data base journals including Scopus and also in ISI Web of Science journals, from my country and from other countries and also for publishing chapters in common books.

I enjoyed and currently enjoy, my working time with Dmitriy Babenko and I know him as a truly valuable scientific person capable for working to absolutely any team. He is honest, incredibly hard-working, individual and also in group of workers with the same scientific interest.

Dmitriy Babenko's knowledges on Microbiology and his expertise in this complex field of research, was a huge advantage for our collaboration. As I mentioned above, actually, he put his skillset to work in microbiology for written articles as a result of his work in the lab, currently for publishing scientific papers as PhD student and also for finalizing his PhD thesis. Therefore, I appreciate that Dmitriy Babenko is an impressive scientist on a complex field of research as Microbiology, with excellent results of work in the lab as PhD student. In this context, as I wrote before, results of his work could be seen to a long list of publications as articles and as chapters into books. For example, he is author to a chapter from my international collaborative book published in 2016 in LAP Editure, after a project for PhD students and for MSc students, where I was manager three years, entitled Classic and Modern Methods for Diagnostics in Human Pathology.

Along with his undeniable talent, Dmitriy Babenko has always been an absolute joy to work with him. He is a true team worker, as an academic person and always able to manage positive discussions and bring the best knowledges related to medical Microbiology, to other collaborators who take part in his work team.

Without a doubt, I confidently recommend Dmitriy Babenko as a dedicated and knowledgeable PhD student and an all-around great person and strongly believe in the successfully end of his PhD thesis.

Please feel free to contact me at Faculty of Medicine, Transilvania University Brasov. I will be happy to expand discussion on my recommendation for Dmitriy Babenko.

Brasov, Romania,

14.Oct.2016

Sincerely,

Lecturer MD PhD, Antonella Chesca
